

Windham counselors:

# advisors

**D**uring Texas School Guidance and Counseling Week (Feb. 7-11, 2011), Windham School District proudly recognizes its professional counselors. These employees provide guidance to students while supporting teachers and administrators – as well as TDCJ personnel.

Counselors in correctional education work in a difficult high security environment with some of the most challenging Texas students. We thank these men and women for helping place offenders in appropriate education programs, assisting instructors in resolving student behavioral problems, coordinating unit testing programs, and providing group and classroom counseling.

WSD counselors are part of the reason offender students in Texas experience school success and make strides toward viable employment in the free world. We appreciate the positive changes our counselors make daily – in countless lives.
