

From WSD Superintendent
Debbie Roberts:

Recognizing excellence:

Special Education administrators helping offenders meet learning challenges

Special Education Administrators in Texas are recognized annually for their commitment, professionalism, and role in educational achievement.

Windham appreciates the principals who oversee special education programs for offender students. Special instruction is supported for these offenders who have learning disabilities, emotional disturbance, mental retardation, vision and/or hearing impairments, orthopedic impairments, and other disabilities.

We appreciate the administrators – and valuable teachers, too — who meet the day by day challenge of helping these students experience victory. Thanks to you, remarkable work is taking place in special education classrooms.
